TMC Biodesign Information Session:
Join members of the TMC Innovation Institute to learn more about our Biodesign Fellowship program, get details on the recruitment process, and ask questions. Food & drinks will be provided, as well as tours of the TMC Innovation Institute! The Eventbrite link to register is https://www.eventbrite.com/e/tmc-biodesign-information-session-tickets-39235179478.

Can't make it in person? Join us virtually: https://zoom.us/j/512629898

About Texas Medical Center Innovation Institute
We are located in the largest medical center in the country with over $2B in extramural funding and ~10M patient visits per year across 21 renowned hospitals and the 10 associated academic institutions. We are comprised of the TMCx accelerator program, TMCx+ incubator, TMC Biodesign fellowship program, and our resident corporate partner relationships with J&J, AT&T, and Apple.

ABOUT BIODESIGN
TMC Biodesign fellows come from all backgrounds (engineering, medicine, business, design, computer science, and research) and work together in interdisciplinary teams to observe and identify unmet needs to then create products which solve them. From the start, team members are immersed in the clinical experience, uncovering, analyzing and prioritizing needs before exploring and implementing potential solutions. There are two tracks per year: medical device and digital health. Each track is paired with a highly-tailored curriculum and mentorship to both teams as they develop solutions.

To apply, visit: tmcbiodesign.slideroom.com
(DEADLINE: Jan 28, 2018)
