RONALD REAGAN CONTINUITY

- Ambulatory Medicine – 4 weeks
- Inpatient Medicine – 8 weeks
- Neurology – 4 weeks
- Psychiatry – 4 weeks

Ronald Reagan-UCLA Medical Center provides a 20-week continuity experience with 8 weeks in Inpatient Medicine, 4 weeks in Ambulatory Medicine, 3 weeks in Neurology, and 5 weeks in Psychiatry. Students will have the opportunity to see patients they cared for in the inpatient setting, in post-discharge clinics in the UCLA Health System (Ronald Reagan and Santa Monica UCLA Medical Centers). All students will be paired with a Clinician Educator (faculty in the Department of Medicine at Ronald Reagan UCLA Medical Center) whom they will meet with on a weekly basis in order to refine the skills and practices essential to the development of the 3rd year medical student. For the six months of the continuity experience, the student's longitudinal preceptor will be a Clinical Preceptor (faculty at Ronald Reagan or Santa Monica) assigned through the Ronald Reagan Continuity. Students will have the opportunity to submit requests for a Clinical Preceptor prior to the start of the Continuity. Once assigned a Clinical Preceptor, no further changes can be made.
