

Easy Maintenance

Natural cooling of the unit's condenser eliminates the need for a condenser fan. Periodic cleaning of a filter is therefore not required, making periodic maintenance minimal. Standard castors and leveling feet make relocation easy.

General Purpose Storage - Maintenance Free

- Storage at -30°C with auto-defrost with consistent temperature control below -20°C during defrost cycle.
- Maintenance free storage - no end user intervention to defrost unit and clean-up condensate.
- Precision temperature uniformity throughout chamber due to forced air circulation with dual fans.
