UCLA's world-class hospitals, extensive training sites, and enriching patient experiences prepare trainees to live a life of impact.

Our mission is to deliver leading-edge patient care, research, and education.

**Over 100 ACGME-
accredited specialty
and subspecialty
programs**

**Nearly 1,400
post-graduate
training positions**

**Diverse training sites
across Los Angeles**

OUTSTANDING CLINICAL TRAINING

Hone your practice while making a difference

Clinical Range

Trainees benefit from a spectrum of complex care experiences.

OUTSTANDING CLINICAL TRAINING

Hone your practice while making a difference

“If you really want to get different learning environments, we rotate at so many different hospitals. You go to a community hospital, a county hospital, and a tertiary hospital where the medical complexity is some of the most complex in the country. Having those different types of training experiences is what makes UCLA unique.”

- Dr. Maya Ayoub
Fellow, UCLA Pediatric Neurology

OUTSTANDING CLINICAL TRAINING

Hone your practice while making a difference

State-of-the-Art Training Facilities

Advanced training facilities create a rich environment for mastering clinical techniques and procedural knowledge.

GROWTH AND DISCOVERY

Realize your potential

Leading Research

Pursue basic science, clinical, and health services research with national leaders.

“My decision to pursue my residency training at UCLA was multifaceted. First, the phenomenal clinical training at a quaternary academic medical center was alluring. The integration between the pediatric and adult hospital systems allows for multidisciplinary conferences, seminars, and events that collectively offer a unique lens to our training. Second, Los Angeles is one of the most richly diverse cities on all fronts -- race, ethnicity, socioeconomic status, immigration status, gender identity, sexual orientation, religion, age, and disability status, to name a few. Third, UCLA Health has several physician scientists who serve as leaders and collaborators in their field as well as mentors to rising trainees.”

- Dr. Cody Aros

Resident, UCLA Pediatrics

Clinical research

Basic science research

Health services research

\$559 million in NIH-funded research grants

GROWTH AND DISCOVERY

Realize your potential

Trainees get inspiration from experts in academic and clinical medicine.

Outstanding Mentors

Giving and receiving mentorship provide enriching support, camaraderie, and perspectives.

GROWTH AND DISCOVERY

Realize your potential

“I am proud to work with so many committed colleagues, students, and residents at UCLA who foreground health justice in everything they do.”

- Helena Hansen, MD, PhD

Chair, Research Theme in Translational Social Science and Health Equity

GROWTH AND DISCOVERY

Realize your potential

Physician-Scientist Pathway

STAR Program

Advance your physician-scientist training by pursuing a PhD at UCLA, Caltech, or RAND simultaneously with clinical specialty training at UCLA.

Collaborative Campus

Our compact campus is home to leading experts in public health, engineering, computation, genetics, and other fields. Collaborations and life-changing conversations are just a short walk away.

In just 5 minutes, our trainees can walk to:

- Fielding School of Public Health
- UCLA School of Nursing
- UCLA School of Dentistry
- Terasaki Life Sciences Building
- California Nanosystems Institute
- Biomedical Sciences Research Building
- Henry Samueli School of Engineering
- Neuroscience Research Building
- Department of Human Genetics
- Department of Computational Medicine

SEE YOURSELF HERE

We Look Forward To Meeting You!

We hope you see yourself growing and thriving as part of our UCLA community. Get an even more comprehensive view of life with us by enjoying video tours, stories and interviews spotlighting the remarkable students, staff, faculty and trainees who have made us the youngest top-10 medical school in the nation.

▶ [See yourself here](#)

We wish you the best of luck in finding not only the perfect place to continue your post-graduate training, but also a place you can call home.

Very sincerely yours,

Nelson Soohoo, MD
