

Does your PTSD still affect your daily life despite extensive therapy?

Are you **male** and
between **25** and
60 years old?

Join our innovative clinical trial to improve
Treatment-resistant PTSD!

To improve your persisting symptoms, we use an
innovative deep brain stimulation therapy called
Responsive Neurostimulation (RNS).

This research is conducted at the **VA GLA** and at **UCLA**
and sponsored by the **NIH**.

You will be compensated for attendance at study visits.
