

Speaker Series

Joint Seminar with Integrative Center for Neurogenetics

Guest Speaker

“Social-Science Genomics: Promises, Pitfalls, and Progress Report”

Daniel J. Benjamin, PhD

**Associate Professor (Research) of Economics
Center for Economic and Social Research
and Department of Economics
University of Southern California**

Social-science genomics is a new field that uses genetic data in social-science research. The talk will provide background on why social scientists are interested in genetic data, the recent history of the field, and some of its promises and pitfalls. The talk will also discuss recent progress, current challenges, and next steps.

Monday, December 17, 2018

11:00am – 12:00pm

Gonda Building 1st Floor Conference Room, 1357

Light snack will be provided
