

Speaker Series

Guest Speaker

CANCELLED

Clement Chow, PhD

Assistant Professor

Department of Human Genetics

University of Utah, School of Medicine

Our lab is focused on understanding the role of genetic variation on disease outcomes. We employ quantitative and functional tools, in a variety of model organisms, to study how genetic variation impacts basic cellular traits important to human health. Our work in model organisms will help to model and inform studies of genetic variation in the human population. We hope to identify variation that can lead to more precise, personalized therapies, especially for rare disease.

Monday, March 23, 2020

11:00am – 12:00pm

Gonda Building 1st Floor Conference Room, 1357

Light snacks will be provided

To meet with Dr. Clement Chow, please contact:

Host: Dr. Kirk Lohmueller, klohmueller@ucla.edu

To receive seminar notices, contact Charina McDonald (cmcdonald@mednet.ucla.edu)
