

Speaker Series

"New methylation- and SNP arrays from Illumina"

Speakers: Brenda DeGerald, Rishi Porecha and Bret Barnes
Affiliation: Illumina Inc, San Diego

Methylation has largely been under-utilized in the transformational and clinical space to date. Learn how Illumina is working with organizations like UCLA to accelerate utility and novel applications that are impacting clinical practice and patient lives. You may be surprised to see what's happened over the last two years.

With the decreasing cost and increased utility of whole-genome sequencing, Illumina has leveraged global reference genome consortia to optimize content designs for precision medicine and wellness testing arrays. Learn how the "All of Us" program is inspiring and accelerating precision health programs across the United States via the Global Diversity (research) Array.

Wednesday, May 22, 2019

1:00pm – 2:00pm

Gonda Building 1st Floor Conference Room, 1357

Light snacks will be provided

Hosted By: Dr. Steve Horvath, shorvath@mednet.ucla.edu

To receive seminar notices, contact Charina McDonald (cmcdonald@mednet.ucla.edu)
