Guest Speaker

“Precision medicine in type 2 diabetes”

Markku Laakso, MD, PhD

Professor in Medicine

Institute of Clinical Medicine

University of Eastern Finland, Kuopio, Finland

Diabetes is a heterogeneous group of metabolic disorders. The application of precision medicine in diabetes has been demonstrated in monogenic disease. However, diabetes and especially type 2 diabetes is a highly heterogeneous disease for which disease-causing pathways are incompletely understood. Sub-classification of patients with type 2 diabetes by genetic pathways may offer a step toward genetically informed patient management.

Wednesday December 4, 2019

11:00am – 12:00pm

Gonda Building 1st Floor Conference Room, 1357

Light snacks will be provided

To meet with Dr. Markku Laakso, please contact:

Host: Dr. Jake Lusic, rosachen@ucla.edu

To receive seminar notices, contact Charina McDonald (cmcdonald@mednet.ucla.edu)
