

Dear Students,

The UCLA Simulation Center has acquired three free virtual simulation resources to augment your remote learning during the COVID-19 pandemic. Below are instructions on how to access them.

Sim Resource #1: Oxford Medical Simulation (free access through June 30, 2020)

OMS provides interactive virtual patient cases where you have to make decisions in patient care and team management and communication.

You should have already received an email invitation from info@oxfordmedicalsimulation.com to set up your account for the web application. Follow the link in the email to set up a password for your account. If you do not see this email, please check your junk/spam folder. If still missing, please email SimTeam@mednet.ucla.edu to ask us to resend the invitation.

1. Download the OMS desktop app using one of these links:
 - o [Windows/PC](#)
 - o [Mac](#)
2. Login on the web app using Chrome: <https://www1.oms-app.com/>
3. Complete the "**SEM000US - Tutorial and Orientation**" scenario. You will see other scenarios as they become available to you – they are assigned according to course requirements.
4. Email simteam@mednet.ucla.edu if you have questions or trouble accessing your account.

You do not need VR headsets to do these cases, but for optimal gameplay, we recommend that you use a desktop or laptop computer that is under 5 years old with these specifications:

- Operating System - Windows 10 or Mac OS Mojave and above
- Intel i5 or above
- 8GB Ram
- Integrated graphics card
- Storage: minimum 15GB free space for installation and running

Please try this out the Tutorial and Orientation as soon as you can and let us know if you have technical difficulties – we want to resolve these before you have to do these cases for your courses (Transition to Clerkship, Foundations of 4th Year and IM Clerkship). Please let us know if you do not have a computer that can support this and we will make arrangements.

Sim Resource #2: UMedic

UMedic is the online supplement to our Harvey auscultation simulator. You can review heart sounds and test your knowledge via these online modules. All students have access via their Mednet accounts.

- Login with your AD account at <https://uclahs.fyi/umedic>

Sim Resource #3: GIBLIB (free access through June 30, 2020)

GIBLIB is an online repository of narrated medical talks and surgical videos. Use this to refresh on your understanding of various topics and to prepare for your clinical rotations.

Please check for an email from giblib.com – you may need to look in your Spam filter and release that email if it ends up there.

- Visit app.giblib.com and click “Log In” in the upper right hand corner
- Enter your login credentials
 - Username: your email
 - Temporary Password: **UCLAGIBLIB01**
- To change your password:
 - Insert your email in the login window
 - Click “Forgot Password?”
 - A link will be sent to your email to reset your password - please note this link is valid for 10 minutes
